

RADI 6033
Physics of Radiotherapy II
Spring 2018

CLASS DAYS and TIME: Monday and Wednesday (10:30 – 12:00pm)

CLASSROOM: CTCRC Building - Grossman Plaza (G254)

COURSE DIRECTOR: Niko Papanikolaou, Ph.D.

COURSE LECTURERS: Niko Papanikolaou, Ph.D., Sotirios Stathakis, Ph.D., Neil Kirby, Ph.D., Karl Rasmussen Ph.D., Daniel Saenz, Ph.D.

OFFICE LOCATION and HOURS: By Appt. Office: G242

EMAIL: papanikolaou@uthscsa.edu

TELEPHONE: 210-450-5664

READ THIS DOCUMENT CAREFULLY - YOU ARE RESPONSIBLE FOR ITS CONTENTS.

COURSE DESCRIPTION AND OBJECTIVES

Theory, design, and operation of radiation producing equipment used in radiation therapy. Exposure and absorbed dose calculations, patient dosimetry, treatment planning, and use of computers in radiation therapy.

Pre-requisites – RADI 6030

Semester credit hours – 3

By the end of this course, each student should be able to:

- Demonstrate that they understand how x-rays are generated and how radiation producing machines are used in the clinic.
- Demonstrate that they understand the physical and mathematical principles of the different radiation interactions as well as their clinical significance.
- Demonstrate that they understand how dose distributions are generated and how scatter analysis is performed.
- Demonstrate that they understand how to perform dosimetry calculations related to treatment planning using various techniques.
- Demonstrate that they understand the fundamentals of modern day radiation therapy treatment techniques and associated equipment.
- Demonstrate that they understand how special procedures are performed in a clinical environment and the physics implications that go along with them.

COURSE ORGANIZATION

The course is designed as an advanced application to radiation therapy fundamentals and covers the second half of the primary reference which is the book by Faiz Khan on “The Physics of Radiation Therapy”, along with supplemental lectures as deemed necessary. Lectures will be given in the form of slide presentations, together with discussion using the white board in the classroom. There is a list of reading materials and references that the students are responsible to read. A quiz will be given at the end of each unit. All materials will be available on CANVAS, including the quizzes. The students will need to have a laptop or tablet device to take the quizzes in the classroom

Materials – See below under the Textbooks section

Computer Access – The presentations are given in the common lecture format and are accompanied by Pdf converted PowerPoint slide files. You are responsible for all information included in the lecture materials. However, you should not assume that all testable lecture material is found only in the posted materials. That is, lectures may be expanded and enhanced during in-class presentations. So, take good notes because any information discussed in class is considered testable.

Reading Assignments – Required reading assignments are posted in the schedule of class meetings (shown below) and are never considered optional. Unless specifically noted by the instructor, anything in the required readings, whether emphasized in class or not, is considered testable on exams. Mandatory readings are primarily found in the required textbook (see below). However, occasionally a reading assignment will be given that is posted online or sent to you via email attachment.

ATTENDANCE

In order to achieve the expected level of competency, students must be fully engaged. Therefore, attendance for every class session is expected. It is recognized that a student may occasionally arrive late to class due to unexpected traffic problems or inclement weather. However, chronic lateness is considered an unprofessional behavior that disrupts the learning environment for everyone else in the classroom.

TEXTBOOKS

Required:

- The Physics of Radiation Therapy, 4th Edition, Faiz M. Khan; Lippincott, Williams & Wilkins, 2009
- Brachytherapy Physics, Second Edition. Authors: Bruce Thomadsen, Mark Rivard and Wayne Butler, eds. ISBN: 1-930524-24-2 Published: 2005 | 982 pp. | Hardcover
- Shielding Techniques for Radiation Oncology Facilities, Second Edition Authors: Patton H. McGinley ISBN: 1-930524-07-2 Published: 2002 | 184 pp.

GRADING POLICIES AND EXAMINATION PROCEDURES

Testable material comes from 3 main sources: Lecture presentation, reading assignments and in class discussion. Final letter grades will be based on the multiple choice type quizzes that will be scheduled throughout the semester. Each exam will be equally weighted.

Late Arrival to Exams: Exams will be timed. If you arrive late to an exam, and are given permission to take the exam, you will not be given additional time to complete your test. If you miss an exam for an excused reason, you may be eligible to schedule a make-up exam.

Make-up Examinations: A student who must miss a scheduled exam for a serious reason must request an excused absence from the Course Director. Acceptable “serious reasons” usually involve serious illness or injury to the student (doctor’s excuse may be required) or the student’s family member. Examples of unacceptable reasons include: Not prepared or incomplete studying, over-sleeping, heavy traffic or any travel delays, other appointments or scheduled professional or personal commitments. If it is determined that missing an exam is justified, a make-up examination will be scheduled. The make-up exam will be given as soon as possible at a time designated by the Course Director. Any student who misses an exam and does not receive an excused absence **will receive a grade of zero for that exam.**

Grading System

A = 90-100% B = 80-89% C = 70-79% F = < 69%

REQUESTS FOR ACCOMODATIONS FOR DISABILITIES

In accordance with policy 4.2.3, **Request for Accommodation Under the ADA and the ADA Amendments Act of 2008 (ADAAA)**, any student requesting accommodation must submit the appropriate request for accommodation under the American with Disabilities Act (ADA, form 100). to his/her appropriate Associate Dean of their School and a copy to the ADA Coordinator. Additional information may be obtained at <http://uthscsa.edu/eo/request.asp>.

ACADEMIC INTEGRITY AND PROFESSIONALISM

Any student who commits an act of academic dishonesty is subject to discipline as prescribed by the UT System Rules and Regulations of the Board of Regents. Academic dishonesty includes, but is not limited to, cheating, plagiarism, collusion, the submission for credit of any work or materials that are attributable in whole or in part to another person, taking an exam for another person, signing attendance sheets for another student, and any act designed to give unfair advantage to a student or the attempt to commit such an act. Additional information may be obtained at <http://catalog.uthscsa.edu/generalinformation/generalacademicpolicies/academicdishonestypolicy/>

Title IX Defined:

Title of the Education Amendments of 1972 is a federal law that prohibits sex discrimination in education. It reads “no person in the United States shall, on the basis of sex, be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any education program or activity receiving Federal financial assistance.”

University of Texas Health Science Center San Antonio’s Commitment:

University of Texas Health Science Center San Antonio (UTHSCSA) is committed to maintaining a learning environment that is free from discriminatory conduct based on gender. As required by Title IX, UTHSCSA does not discriminate on the basis of sex in its education programs and activities, and it encourages any student, faculty, or staff member who thinks that he or she has been subjected to sex discrimination, sexual harassment (including sexual violence) or sexual misconduct to immediately report the incident to the Title IX Director.

In an emergency, victims of sexual abuse should call 911. For non-emergencies, they may contact UPD at 210-567- 2800. Additional information may be obtained at <http://students.uthscsa.edu/titleix/>

EMAIL POLICY

Every student is issued a University e-mail address and account at the time of enrollment. As a matter of University Policy, communications between students and faculty that occur using the student’s University e-mail address is considered official business. Therefore, students are expected to check their university email inboxes on a regular basis so that any announcements, instructions, or information regarding this course will be received in a timely way. Missed communications due to inadequate monitoring of incoming emails on the University’s email server will never be a valid excuse for unsatisfactory academic progress.

USE OF RECORDING DEVICES

Recording of lectures and other learning activities in this course by any means (*e.g.*, video, audio, etc.) is only permitted if approved by the instructor or required for compliance with Americans with Disabilities Act (ADA).

ELECTRONIC DEVICES

Cell phones must be turned off during all class meetings and exams. Computers and electronic tablets are allowed only for participating in classroom activities (*e.g.*, viewing slides presented in lecture or conference materials). No texting, tweeting, emailing, web-surfing, gaming, or any use of electronic devices that is not directly connected with classroom activities is permitted.

TENTATIVE CLASS SCHEDULE
RADI 6033
Physics of Radiotherapy
Spring 2017

C#	Date	Lecture Topic	Required Reading	Instructor
0	Monday, January 09, 2017	Official start of semester		
1	Monday, January 09, 2017	Introduction to course and expectations Introduction to Radiation Protection	Ch. 16 - Khan	Dennis N. Stanley Ph.D.
2	Wednesday, January 11, 2017	Shielding Design and Vault construction	Shielding Techniques for Radiation Oncology Facilities by McGinley	Sotirios Stathakis, Ph.D.
3	Monday, January 16, 2017	University Holiday		
4	Wednesday, January 18, 2017	Shielding Design and Vault construction	Shielding Techniques for Radiation Oncology Facilities by McGinley	Sotirios Stathakis, Ph.D.
5	Monday, January 23, 2017	Shielding Design and Vault construction	Shielding Techniques for Radiation Oncology Facilities by McGinley	Sotirios Stathakis, Ph.D.
6	Wednesday, January 25, 2017	Shielding Design and Vault construction	Shielding Techniques for Radiation Oncology Facilities by McGinley	Sotirios Stathakis, Ph.D.
7	Monday, January 30, 2017	Shielding Design and Vault construction	Shielding Techniques for Radiation Oncology Facilities by McGinley	Sotirios Stathakis, Ph.D.
8	Wednesday, February 01, 2017	Three-Dimensional Conformal Radiation Therapy	Ch. 19 - Khan	Dewayne Defoor, Ph.D.
9	Monday, February 06, 2017	Intensity-Modulated Radiation Therapy	Ch. 20 - Khan	Dewayne Defoor, Ph.D.
10	Wednesday, February 08, 2017	Intensity-Modulated Radiation Therapy	Ch. 20 - Khan	Dewayne Defoor, Ph.D.
11	Monday, February 13, 2017	Stereotactic Radiotherapy and Radiosurgery	Ch. 21 - Khan	Niko Papanikolaou, Ph.D.
12	Wednesday, February 15, 2017	Stereotactic Radiotherapy and Radiosurgery	Ch. 21 - Khan	Niko Papanikolaou, Ph.D.
13	Monday, February 20, 2017	Stereotactic Body Radiation Therapy	Ch. 22 - Khan	Niko Papanikolaou, Ph.D.
14	Wednesday, February 22, 2017	Stereotactic Body Radiation Therapy	Ch. 22 - Khan	Niko Papanikolaou, Ph.D.
15	Monday, February 27, 2017	Treatment Planning Algorithms		Niko Papanikolaou, Ph.D.

16	Wednesday, March 01, 2017	Special Stereotactic Machines: Cyberknife and Gammaknife		Neil Kirby, Ph.D.
17	Monday, March 06, 2017	Total Body Irradiation/ Total Skin Electron Therapy	Ch. 18 - Khan , TG- 23	Courtney Stanley, MS
18	Wednesday, March 08, 2017	Total Body Irradiation/ Total Skin Electron Therapy	Ch. 18 - Khan , TG- 24	Courtney Stanley, MS
19	Monday, March 13, 2017	University Holiday- Spring Break		
20	Wednesday, March 15, 2017	University Holiday- Spring Break		
21	Monday, March 20, 2017	Brachytherapy: History , LDR, HDR and Implant Therapy	Ch. 15 , Ch.23-24	Karl Rasmussen Ph.D.
22	Wednesday, March 22, 2017	Brachytherapy: History , LDR, HDR and Implant Therapy	Ch. 15 , Ch.23-24	Karl Rasmussen Ph.D.
23	Monday, March 27, 2017	Brachytherapy: History , LDR, HDR and Implant Therapy	Ch. 15 , Ch.23-24	Karl Rasmussen Ph.D.
24	Wednesday, March 29, 2017	Brachytherapy: History , LDR, HDR and Implant Therapy	Ch. 15 , Ch.23-24	Karl Rasmussen Ph.D.
25	Monday, April 03, 2017	Brachytherapy: History , LDR, HDR and Implant Therapy	Ch. 15 , Ch.23-24	Karl Rasmussen Ph.D.
26	Wednesday, April 05, 2017	Prostate Implants: Technique, Dosimetry, and Treatment Planning	Ch. 24 - Khan	Niko Papanikolaou, Ph.D.
27	Monday, April 10, 2017	Eye Plaques: Technique, Dosimetry, and Treatment Planning	TG -129	Niko Papanikolaou, Ph.D.
28	Wednesday, April 12, 2017	Intravascular Brachytherapy	Ch. 25 - Khan	Neil Kirby, Ph.D.
29	Monday, April 17, 2017	Image-Guided Radiation Therapy	Ch. 26 - Khan	Dennis N. Stanley Ph.D.
30	Wednesday, April 19, 2017	Image-Guided Radiation Therapy	Ch. 26 - Khan	Dennis N. Stanley Ph.D.
31	Monday, April 24, 2017	Image Registration and Image Deformation		Neil Kirby, Ph.D.
32	Wednesday, April 26, 2017	Deformable Image Registration QA		Neil Kirby, Ph.D.
33	Monday, May 01, 2017	Deformable Image Registration QA		Neil Kirby, Ph.D.
34	Wednesday, May 03, 2017	Quality Assurance	Ch. 17 - Khan	Niko Papanikolaou, Ph.D.

35	Monday, May 08, 2017	Proton Beam Therapy	Ch. 27 - Khan	Niko Papanikolaou, Ph.D.
36	Wednesday, May 10, 2017	Proton Beam Therapy	Ch. 27 - Khan	Niko Papanikolaou, Ph.D.
37	Monday, May 15, 2017	Final Exam
