

TSCI 6060: Patient Oriented Clinical Research Methods 2 2 hrs Spring 2017

**Co-Directors – Byeong Choi, PhD
Jon Gelfond, MD, PhD**

Patient Oriented Clinical Research Methods – 2

Spring 2017

CLASS DAYS and TIME: Mondays (January 9 – May 15, 2016), 3:00 – 5:00 pm

CLASSROOM: LEC 2.042

COURSE DIRECTORS: Byeong Choi, PhD, Jonathan Gelfond, MD, PhD

OFFICE LOCATION and HOURS: ADM 3.314, Monday – Friday (8:00 am – 5:00 pm by appointment)

EMAIL: ChoiB@uthscsa.edu gelfondjal@uthscsa.edu

TELEPHONE: 210-567-0854

READ THIS DOCUMENT CAREFULLY – YOU ARE RESPONSIBLE FOR ITS CONTENTS

COURSE DESCRIPTION AND OBJECTIVES

This interdisciplinary course is the first in a two-semester sequence designed to train participants in the conduct of patient-oriented clinical research.

Pre-requisites – TSCI 5071 is the only pre-requisite for this course.

Semester credit hours – 2.0 SCH

LEARNING OBJECTIVES and COMPETENCIES

By the end of the course, degree candidates will be able to:

1. Propose study designs for prospectively addressing a translational research question.
2. Assess the strengths and weaknesses of possible prospective study designs for a given translational research questions (cohort studies and clinical trials).
3. Identify existing appropriate measures (assessments of baseline characteristics and outcomes) of translational research.
4. Assess threats to study validity (bias) including problems with sampling, recruitment, randomization, and comparability of study groups.
5. Assess internal validity in any planned or completed clinical or translational study, including selection bias, misclassification, and confounding.
6. Define criteria for inferring causation from observational investigations.
7. Design strategies for subject retention in a study.

8. Design strategies for monitoring progress in a randomized controlled trial.
9. Delineate strategies for minimizing bias in cohort studies and randomized controlled trials.
10. Describe the processes and purposes of using propensity scoring in cohort studies
11. Compare and contrast the uses, strengths, and weaknesses of different clinical trial designs.
12. Critically appraise research reports of cohort studies and randomized controlled trials.
 - a. Utilize the STROBE guidelines for assessing an observational study
 - b. Utilize the CONSORT statements for assessing a clinical trial
13. Describe the steps in conducting a meta-analysis.
14. Demonstrate knowledge of community-engaged research approaches, including strategies for identification, development, and maintenance of community partnerships.
15. Compare the feasibility, efficiency, and ability to derive unbiased inferences from different translational research study designs (cohort studies and clinical trials).
16. Describe the basic principles and practical importance of random variation, systematic error, sampling error, measurement error, hypothesis testing, type I and type II errors, and confidence limits.
17. Defend the significance of data and safety monitoring plans.
18. Explain the uses, importance, and limitations of early stopping rules in clinical trials.
19. Describe the roles of comparative effectiveness research in the organization of health care and health care policy

COURSE ORGANIZATION

The main teaching modalities used in this course include:

1. Lectures
2. Class discussions requiring active student participation.

Materials:

No special materials are required for this course.

Computer Requirements:

Students are required to have a laptop computer that can connect to and operate over a wireless network.

Software required:

- Microsoft Office Suite (A personal copy of the latest version can be purchased at The UTHSCSA bookstore at student pricing with a student ID)

Laptops with an Apple based Operating System must be able to also operate using a Windows based Operating System. It may be necessary to purchase Windows (student pricing available at The UTHSCSA bookstore with a student ID) and virtualization software.

All laptops will connect to The UTHSCSA network via the HSCwave broadcast wireless connection. Authentication for wireless use is based on The UTHSCSA domain username and password.

Verification of proper operation **prior** to the start of class is highly recommended.

Assistance is available thru the IMS Service Desk

- Telephone:(567-7777
- E-mail (ims-servicedesk@uthscsa.edu)

Assistance is also available at the IMS Student Support Center (4.421T, DTL).

Reading Assignments – Reading assignments will be listed in the individual class sections of this syllabus.

ATTENDANCE

Attendance at scheduled classes and examinations is crucial to meeting course objectives. Therefore, regular attendance in class is expected of each student.

- Attendance is defined as being present within 15 minutes after the scheduled beginning of the class and until 15 minutes before the scheduled ending of the class.
- Excused absences may be granted by the Course Director in cases such as formal presentations at scientific meetings, illness, or personal emergency.
- Excused absences are considered on an individual basis and require electronic communication with the Course Director to request an excused absence. The e-mail request to the Course Director for consideration of an excused absence must provide details regarding the circumstances and specific dates.
- It is expected that students will provide *advanced notice* of absence for scheduled events.
- If a student has excessive unexcused absences in a given course, they will automatically receive a grade of *unsatisfactory* unless *makeup* has been approved by the Course Director.
- Makeup of absences (both excused and unexcused) is allowed at the discretion of the Course Director.
- Allowable unexcused absences will be determined by the credit hours of the course as follows:

Course Semester Credit Hours	Allowable Unexcused Absences
3.0	3
2.0	2
1.0	1

TEXTBOOKS

Required:

- **“Designing Clinical Research”, Fourth Edition**; Hulley SB, Cummings SSR, Browner WS, Grady DG, Newman TB; Lippincott Williams & Wilkins, a Wolters Kluwer Business, Philadelphia, PA 2015; **ISBN/ISSN: 9781608318049**

GRADING POLICIES AND EXAMINATION PROCEDURES

1. Class attendance is essential for anyone who wishes to obtain credit for the course. You must attend 14 of the 16 lectures in order to obtain credit for the course. You can make up any sessions missed due to unexpected schedule conflicts, professional travel, or other extenuating circumstances, provided you contact your course director as soon as you know you will need to miss a class. Any student who fails to meet this requirement will receive an UNSATISFACTORY grade for the course.
2. Three assignments are to be completed during the semester. These assignments are posted on Blackboard. Each assignment will be scored on a 100-point scale. **You must complete and turn-in all 3 assignments on time and receive a minimum score of 70/100 points on each assignment in order to receive credit for the course.**
 - a. A student who completes at least 2 of the assignments with 70/100 points, but fails to complete the 3rd assignment with a score of 70/100 points, will receive an incomplete.
 - b. A student who completes less than 2 of the assignments with a score of 70/100 points will receive an UNSATISFACTORY grade for the course.
3. A student who receives an INCOMPLETE must meet with the Course Director and develop a plan of action to complete the outstanding work. All outstanding work must be completed within 6 months after the end of the course; otherwise the grade will be changed to UNSATISFACTORY.
4. A student who receives an UNSATISFACTORY grade must retake the course in order obtain a change of grade.

Grading System

The grading will be conducted on a pass fail basis and both assignments need a Satisfactory in order to pass the course.

S = Satisfactory U = Unsatisfactory

REQUESTS FOR ACCOMODATIONS FOR DISABILITIES

In accordance with policy 4.2.3, **Request for Accommodation Under the ADA and the ADA Amendments Act of 2008 (ADAAA)**, any student requesting accommodation must submit the appropriate request for accommodation under the American with Disabilities Act (ADA, form 100). To his/her appropriate Associate Dean of their School and a copy to the ADA Coordinator. Additional information may be obtained at <http://uthscsa.edu/eo/request.asp>.

ACADEMIC INTEGRITY AND PROFESSIONALISM

Any student who commits an act of academic dishonesty is subject to discipline as prescribed by the UT System Rules and Regulations of the Board of Regents. Academic dishonesty includes, but is not limited to, cheating, plagiarism, collusion, the submission for credit of any work or materials that are attributable in whole or in part to another person, taking an exam for another person, signing attendance sheets for another student, and any act designed to give unfair advantage to a student or the attempt to commit such an act. Additional information may be obtained at <http://catalog.uthscsa.edu/generalinformation/generalacademicpolicies/academicdishonestypolicy/>

TITLE IX AT UTHSCSA

Title IX Defined:

Title of the Education Amendments of 1972 is a federal law that prohibits sex discrimination in education. It reads “no person in the United States shall, on the basis of sex, be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any education program or activity receiving Federal financial assistance.”

University of Texas Health Science Center San Antonio’s Commitment:

University of Texas Health Science Center San Antonio (UTHSCSA) is committed to maintaining a learning environment that is free from discriminatory conduct based on gender. As required by Title IX, UTHSCSA does not discriminate on the basis of sex in its education programs and activities, and it encourages any student, faculty, or staff member who thinks that he or she has been subjected to sex discrimination, sexual harassment (including sexual violence) or sexual misconduct to immediately report the incident to the Title IX Director.

In an emergency, victims of sexual abuse should call 911. For non-emergencies, they may contact UPD at 210-567-2800. Additional information may be obtained at <http://students.uthscsa.edu/titleix/>

EMAIL POLICY

All correspondence will be sent to the student using the student’s LiveMail address and CANVAS. All correspondence from the student to the course director should be sent to the course director’s e-mail as listed on the first page of this syllabus.

USE OF RECORDING DEVICES

Only with course director’s or instructor’s permission.

ELECTRONIC DEVICES

Cell phones must be turned off during all class meetings and exams. Computers and electronic tablets are allowed only for participating in classroom activities (*e.g.*, viewing slides presented in lecture or conference materials). No texting, tweeting, e-mailing, web-surfing, gaming, or any use of electronic devices that is not directly connected with classroom activities is permitted.

All Classes Held in ROOM 2.042

Wk	Date	Title
1	1/9/2017	Cohort Studies – Uses and Principles – Inception Cohorts, Retrospective and Prospective Designs (Gelfond)
2	1/16/2017	NO CLASS – Martin Luther King Day

Course Text:

Hulley SB, Cummings SR, Browner WS, Grady DG, Newman TB. ***Designing Clinical Research***, 4rd Edition, Lippincott, Williams, and Wilkins, Philadelphia, 2013.

Patient Oriented Clinical Research Methods 2

Week: 1

Date: January 9, 2017

Topic: Cohort Studies – Uses and Principles – Inception Cohorts, Retrospective and Prospective Designs

Instructors: Jonathan Gelfond, PhD, MPH

Learning Objectives and Competencies:

1. Define the different forms of cohort study designs, e.g., prospective vs. retrospective cohorts
2. Describe the strengths and weaknesses of cohort studies
3. Identify when it is appropriate to utilize nested case-control designs within cohort studies
4. Contrast and compare cohort studies with cross-sectional and case-control designs.

Class Assignment: Read the chapter in Hulley and Cummings and be prepared to discuss.

Readings: Hulley and Cummings: **Designing Clinical Research** – Chapter 7: pages 88-96

Patient Oriented Clinical Research Methods 2

Week: 2

Date: January 16, 2017

Instructors:

Topic: **NO CLASS – Martin Luther King Day**

Patient Oriented Clinical Research Methods 2

Week: 3

Date: January 23, 2017

Instructors: Helen Hazuda, Ph.D.

Topic: Retention of Subjects and Minimizing Bias in Prospective Studies

Learning Objectives and Competencies – Participants will be able to:

1. Create plans for tracking subjects within a cohort study or randomized controlled trial.
2. Identify key strategies for retaining subjects enrolled within a cohort study or clinical trial
3. Discuss methods for assessing potential bias attributable to dropping out from prospective studies
4. Describe procedures for ascertaining mortality in cohort studies, especially use of the National Death Index.
5. Describe methods of assessing co-interventions during randomized controlled trials.
6. Discuss the effects of cross-over between study arms of randomized controlled trials.

Class Assignment: Using table 7.3 in Hulley and Cummings as a framework, be prepared to discuss the necessary resources needed to put a tracking system in place for a cohort study, techniques for staying in touch with participants, and how you would prepare and justify a budget to support these resources.

Readings and Bibliography:

1. Hulley and Cummings: **Designing Clinical Research** - Chapter 7, table 7.3 – page 95
2. Hulley and Cummings: **Designing Clinical Research**, Chapter 11 – Alternative Clinical Trial Designs and Implementation Issues, pp. 151-170
3. Review National Death Index Information at: <http://www.cdc.gov/nchs/ndi.htm>

Patient Oriented Clinical Research Methods 2

Week: 4

Date: January 30, 2017

Topic: Clinically Based Cohort Studies

Instructors: Sara Espinoza, MD, M.Sc.

Learning Objectives and Competencies – Participants will be able to:

1. Develop procedures for identifying and recruiting subjects from clinical settings.
2. Discuss effects of differing stages of disease on entry into cohort and generalizability.
3. Describe procedures for maintaining confidentiality of subject records for research purposes in a clinical setting.

Class Assignment: Read assigned material and be prepared to discuss.

Readings and Bibliography: Handouts to be circulated prior to class.

Patient Oriented Clinical Research Methods 2

Week: 5

Date: February 6, 2017

Topic: Principles for Inferring Causation from Observational Studies

Instructors: Byeong Choi, PhD

Learning Objectives and Competencies – Participants will be able to:

1. Identify potential sources of bias that may lead to false inferences in observational research.
2. Describe strategies at the design and analysis stages of the study to ascertain and potentially control for sources of bias.
3. Discuss criteria across studies that support the presence of a causal association in observational research.

Class Assignment: Read assigned material and be prepared to discuss.

Readings and Bibliography:

1. Hulley and Cummings: **Designing Clinical Research**, Chapter 9 – Enhancing Causal Inference in Observational Studies, pp 117-136
2. Bradford-Hill, A. **A Short Textbook of Medical Statistics** (1977). Chapter 24 – *Statistical Evidence and Inference*, pp 285-296, Hodder and Stoughton, London.

Patient Oriented Clinical Research Methods 2

Week: 6

Date: February 13, 2017

Topic: Reading the Literature # 3 – Cohort Studies

Instructors: TBA

Learning Objectives and Competencies – Participants will be able to:

1. Effectively read and critique a published cohort study.
2. Describe the methods for cohort assembly
3. Describe the methods and their validity for ascertaining exposure at baseline and across the time of follow-up.
4. Describe the methods and their validity for ascertaining outcomes in the cohort

Discuss the techniques and their adequacy for adjusting for effects of potential confounding variables.

Class Assignment:

Readings and Bibliography:

Patient Oriented Clinical Research Methods 2
Week: 7
Date: February 20, 2017
Topic: Clinical Trials for Disease Prevention – the AFCAPS/TexCAPS Experience
Instructors: John R. Downs, MD
Learning Objectives and Competencies – Participants will be able to: <ol style="list-style-type: none"> 1. Assess Air Force/Texas Coronary Atherosclerosis Prevention Study (AFCAPS/TexCAPS) methodology for quality using CONSORT Criteria 2. Discuss the roles of clinical trial evidence in developing rationales for primary prevention of chronic diseases 3. Discuss interactions between clinical trial evidence and guideline development
Class Assignment: Read assigned material and be prepared to discuss
Readings and Bibliography: <ol style="list-style-type: none"> 1. Downs JR, Clearfield M, Weis S, Whitney E, Shapiro DR, Beere PA, Langendorfer A, Stein EA, Kruyer W, Gotto AM, for the AFCAPS/TexCAPS Research Group. Primary Prevention of Acute Coronary Events with Lovastatin in Men and Women with Average Cholesterol Levels. JAMA 1998; 279 (20):1615-1622. 2. Third Report of the Expert Panel on Detection, Evaluation, and Treatment of High Blood Cholesterol in Adults (Adult Treatment Panel III). ATP III At-A-Glance: Quick Desk Reference. NIH Publication No. 01-3305. May 2001 3. Lenzer J. Majority of panelists on controversial new cholesterol guideline have current or recent ties to drug manufacturers. BMJ 2013;347:f6989 doi: 10.1136/bmj.f6989 (Published 21 November 2013)

Patient Oriented Clinical Research Methods 2
Week: 8
Date: February 27, 2017
Topic: Propensity Scores in Cohort Studies
Instructor: Byeong Choi, PhD
Learning Objectives and Competencies – Participants will be able to: <ol style="list-style-type: none"> 1. Articulate the utility of propensity scores in the analysis of observational cohort studies 2. Compare and contrast the relative strengths and weaknesses of propensity scores for cohort studies compared to the conduct of a randomized controlled trial
Class Assignment: Read the assigned material and be prepared to discuss in class
Readings and Bibliography: <ol style="list-style-type: none"> 1. Handouts and assigned reading prior to class

Patient Oriented Clinical Research Methods 2

Week: 9

Date: March 6, 2017

Topic: Comparative Effectiveness Research (CER)

Instructor: Barbara Turner, MD

Learning Objectives and Competencies – Participants will be able to:

1. Describe the difference between efficacy and effectiveness studies
2. Design studies using a non-inferiority design when appropriate to the question
3. Explain the role of registries in CER
4. Explain key features of pragmatic trial design and is able to design a pragmatic trial
5. Identify sources of existing data for observational research including electronic health records and administrative claims
6. State the strengths and limitations of different data and the sources of bias and threats to internal validity in each
7. Identify the strengths and limitations of the study designs used in CER

Class Assignment: Read the assigned material and be prepared to discuss

Readings and Bibliography:

2. Handouts and assigned reading prior to class

Patient Oriented Clinical Research Methods 2

Week: 10

Date: March 13, 2017

Instructors:

Topic: **NO CLASS – Spring Break**

Patient Oriented Clinical Research Methods 2

Week: 11

Date: March 20, 2017

Topic: Drug Development – Phase I Studies

Instructors: John Sarantopoulos, MD

Learning Objectives and Competencies – Participants will be able to:

1. Describe the purposes of a Phase I study of a new therapeutic agent
2. Define maximum tolerated dose
3. Discuss the potential benefits, if any, for a subject participating in a Phase I study.
4. Describe methods for enrolling subjects at different dosing levels, and the rationale for moving to the next dosing level.

Class Assignment: Read assigned material and be prepared to discuss

- Readings and Bibliography: – PDF File available on Blackboard:
- Roberts TG, Jr., Goulart BH, Squitieri L, et.al., Trends in the Risks and Benefits to Patients with Cancer Participating in Phase 1 Clinical Trials. JAMA 2004; 292:2130-2140.

Patient Oriented Clinical Research Methods 2

Week: 12

Date: March 27, 2017

Topic: Randomized Controlled Trials – Uses and Principles

Instructors: Jon Gelfond, MD, PhD

Learning Objectives and Competencies – participants will be able to:

1. Contrast the strengths and weaknesses of an experimental vs. observational study.
2. Describe the purpose and rationale for randomization
3. Develop inclusion criteria and describe rationales for excluding persons from entry into a study.
4. Describe the importance of and methods for masking (blinding) the outcome assessment.

Class Assignment: Read assigned material and be prepared to discuss.

Readings and Bibliography:

1. Hulley and Cummings: **Designing Clinical Research**, Chapter 10 – Designing a Randomized Blinded Trial, pp. 147-162

Patient Oriented Clinical Research Methods 2

Week: 13

Date: April 3, 2017

Topic: Randomization Schemes for Clinical Trials

Instructors: Jon Gelfond, MD, PhD

Learning Objectives and Competencies – Participants will be able to:

1. Describe methods for assuring randomization is being done correctly.
2. Describe randomization schemes and their appropriate application in clinical trials

Class Assignment: Read assigned material and be prepared to discuss.

Readings and Bibliography:

1. Hulley and Cummings: **Designing Clinical Research**, Chapter 10 – Designing a Randomized Blinded Trial, pp. 155-159
2. Other handouts circulated prior to class.

Patient Oriented Clinical Research Methods 2

Week: 14

Date: April 10, 2017

Topic: Group Interventions – Community Studies

Instructors: Melissa Valerio, DrPH

Learning Objectives and Competencies – Participants will be able to:

1. Describe the steps necessary to garner community support for group intervention studies
2. Discuss strategies for assessing the effect of community interventions
3. Identify data sources that may be used to monitor outcomes in community studies

Class Assignment: Read assigned material and be prepared to discuss.

Readings and Bibliography: Handouts to be circulated prior to class.

Hulley and Cummings: **Designing Clinical Research**, Chapter 18, Community and International Studies, pp 268-276.

Patient Oriented Clinical Research Methods 2

Week: 15

Date: April 17, 2016

Topic: Multi-Center Clinical Trials, Monitoring Trial Progress and Stopping Rules

Instructors: TBA

Learning Objectives and Competencies – Participants will be able to:

1. Describe procedures for organizing and conducting multi-center clinical trials.
2. Develop methods for monitoring clinical trial progress
3. Describe techniques for decisions to stop clinical trials
4. Discuss the effects of repeated interim analyses on study power to detect primary outcomes.

Class Assignment: Read assigned material and be prepared to discuss

Readings and Bibliography:

1. Hulley and Cummings: **Designing Clinical Research**, Chapter 11 – Alternative Trial Designs and Implementation Issues, pp. 163-182
2. Handouts to be circulated prior to class.

Patient Oriented Clinical Research Methods 2

Week: 16

Date: April 24, 2017

Topic: Reading the Literature #4 – Randomized Controlled Trials

Instructors: Jon Gelfond, MD, PhD

Learning Objectives and Competencies – Participants will be able to:

1. Critically assess a published report of a randomized controlled clinical trial
2. Assess the eligibility and exclusion criteria for subjects and their relation to ones own work.
3. Determine whether the randomization process was successful
4. Determine whether the outcome assessments were appropriately and completely ascertained.
5. Assess the clinical and statistical impact of the reported outcomes.
6. Identify criteria for what should be expected to be included in a published report of a randomized controlled clinical trial.

Class Assignment:

- Read assigned material and be prepared to discuss in class.
- Review the CONSORT STATEMENT.
- Then take the randomized trial of palliative medicine in non-small cell lung cancer and rate the report against the CONSORT guidelines.

Readings and Bibliography:

1. Randomized Controlled Trial:

- Granger, C.B., Alexander, J.H., McMurray, J.J., Lopes, R.D., Hylek, E.M., Hanna, M., Al-Khalidi, H.R., Ansell, J., Atar, D., Avezum, A. and Bahit, M.C., 2011. Apixaban versus warfarin in patients with atrial fibrillation. *New England Journal of Medicine*, 365(11), pp.981-992.

2. The CONSORT Statement:

- Moher D, Schulz KF, Altman DG, for the CONSORT Group. The CONSORT Statement: Revised Recommendations for Improving the Quality of Reports of Parallel-Group Randomized Trials. *Ann Intern Med* 2001; 134:657-662.
- Altman DG, Schulz KF, Moher D, Egger M, Davidoff F, Elbourne D, Gotzsche PC, Lang T, for the CONSORT Group. The Revised CONSORT Statement for Reporting Randomized Trials: Explanation and Elaboration. *Ann Intern Med* 2001; 134:663-694.
- Ioannidis JPA, Evans SJW, Gotzsche PC, et.al. Better Reporting of Harms in Randomized Trials: An Extension of the CONSORT Statement. *Ann Intern Med* 2004; 141:781-788.

Patient Oriented Clinical Research Methods 2

Week: 17

Date: May 1, 2017

Topic: Conduct of a Meta-Analysis

Instructors: TBA

Learning Objectives and Competencies – Participants will be able to:

1. Identify and apply assessment tools for determining the quality of published randomized controlled trials.
2. Describe the underlying mathematical principles for pooling results in a meta-analysis.
3. Take data from several randomized controlled trials, pool them, and calculate summary statistics of the resulting odds ratio.

Class Assignment: Read assigned material and be prepared to discuss

Readings and Bibliography:

1. Hulley and Cummings: **Designing Clinical Research**, Chapter 13 – Research Using Existing Data, pp. 192-207.
2. Handouts to be circulated prior to class.

Patient Oriented Clinical Research Methods 2

Week: 18

Date: May 8, 2017

Topic: Guideline Development – Interactions Between the Public, Professional Societies, and

Instructors: John R. Downs, MD

Learning Objectives and Competencies – Participants will be able to:

1. Assess whether the 2013 AHA/ACC guidelines on cholesterol management meet Institute of Medicine Standards for Clinical Practice Guidelines
2. Describe the National Heart Lung and Blood Institute's approach to guideline development in light of changing standards.

Class Assignment: Read assigned material and be prepared to discuss.

Readings and Bibliography: Handouts to be circulated prior to class.
