COURSE DESCRIPTION AND OBJECTIVES

This course is designed to familiarize the student with the historical and contemporary literature related to periodontics. The first-year course is concerned mainly with basic science literature while second- and third-year courses concentrate on the clinical literature. Students have the opportunity to evaluate the data in the literature, critique experimental design, abstract articles, critically evaluate research findings, and learn to use library resources.

Pre-requisites – None

Semester credit hours – Fall = 1.0SCH; Spring = 1.0 SCH

By the end of this course, each student should be able to:

- Succinctly abstract scientific articles to provide fundamental understanding of study purpose, design, findings, data analysis, and relevance to other evidence.
- Critically evaluate strengths and weaknesses of basic science, in vitro, in vivo and clinical studies
- Understand the evidence base supporting classic and current periodontal and dental implantology topics as outlined in the Classic Literature Reading List

COURSE ORGANIZATION

The main teaching modalities used in this course include:

- 1) reading and abstracting of articles**
- 2) seminar discussion of articles, abstracts and other relevant evidence**
- 3) oral examination at end of each semester given by two faculty**

Materials – Literature for each seminar is derived from Classic Literature Reading List provided to each resident at the beginning of the academic year
