

**INTD 6007 (Module 2 of INTD 5007)
Advanced Cell Biology (2 credits)**

Spring 2017

CLASS DAYS and TIME: Tuesdays & Thursdays, 9:00-10:50 am, between March 9, 2017 and May 11, 2017

CLASSROOM: MED 2.212C

COURSE FACULTY: LuZhe Sun, Ph.D

OFFICE LOCATION and HOURS: MED 2.020V-1, by appointment

EMAIL: SunL@UTHSCSA.EDU

TELEPHONE: 210-567-5746

READ THIS DOCUMENT CAREFULLY - YOU ARE RESPONSIBLE FOR ITS CONTENTS.

COURSE DESCRIPTION AND OBJECTIVES

This is a 9 and half-week course that represents one-half of INTD 5007, Advanced Cell and Molecular Biology. It may be taken separately as an individual course. The course provides an in-depth learning experience that instructs students on the fundamentals of cell biology as well as prepares the students to evaluate and design new research in the cutting-edge areas of modern cell biology. The course combines a didactic program of lectures along with a small-group discussion format in which students interact closely with a group of faculty who have active research programs. The course focuses on active areas of research in cell biology: Protein Processing, Cell Membrane and Ion Movement, Cell Signaling, Adhesion, and Communication, Cell Growth, and Cell Death. Each week, the faculty provides students with didactic lectures on a current research area. Students and faculty then jointly discuss key publications that serve to bridge the gap between the fundamental underpinnings of the field and the state of the art in that area. The students will then present his/her own “next step” research proposal containing hypothesis, specific aims, rationale, and approaches.

Pre-requisites – None

Semester credit hours – 2 SCH

By the end of this course, each student should:

- Have a comprehensive understanding of how a cell functions as a living unit.
- Be able to apply gained knowledge to the dissection of cellular mechanisms contributing to various physiological and pathological states.
- Be able to propose research projects relevant to the covered topics and assigned reading materials.

COURSE ORGANIZATION

The main teaching modalities used in this course include:

- 1) Didactic lectures by instructors
- 2) Journal article discussion by instructors and students
- 3) Powerpoint presentation of “next step” research proposal by students and group discussion

Materials – They will be emailed to the students from Course Director or Instructors approximately one week prior to the scheduled class.

Computer Access – Please bring a laptop computer for PowerPoint presentation

Reading Assignments – They will be emailed to the students from Course Director or Instructor approximately one week prior to the scheduled class.

ATTENDANCE

Because one large component of the grading is class participation, therefore, attendance for every class session is mandatory. If a student misses a class, the student needs to inform the instructors and course director as soon as possible since this may result in an incomplete for the student. Any scheduled absences must be approved by the course director prior to the absence.

TEXTBOOKS

Required: None

Recommended: None

GRADING POLICIES AND EXAMINATION PROCEDURES

Instructors will provide a number grade (%) for each student along with any comments for improvement.

Grading System

General participation in
discussions
(40%)

Clear PowerPoint presentation
and ability to address
questions
(50%)

Quality of written assignment
(10%)

REQUESTS FOR ACCOMODATIONS FOR DISABILITIES

In accordance with policy 4.2.3, **Request for Accommodation Under the ADA and the ADA Amendments Act of 2008 (ADAAA)**, any student requesting accommodation must submit the appropriate request for accommodation under the American with Disabilities Act (ADA, form 100). to his/her appropriate Associate Dean of their School and a copy to the ADA Coordinator. Additional information may be obtained at <http://uthscsa.edu/eeo/request.asp>.

ACADEMIC INTEGRITY AND PROFESSIONALISM

Any student who commits an act of academic dishonesty is subject to discipline as prescribed by the UT System Rules and Regulations of the Board of Regents. Academic dishonesty includes, but is not limited to, cheating, plagiarism, collusion, the submission for credit of any work or materials that are attributable in whole or in part to another person, taking an exam for another person, signing attendance sheets for another student, and any act designed to give unfair advantage to a student or the attempt to commit such an act. Additional information may be obtained at <http://catalog.uthscsa.edu/generalinformation/generalacademicpolicies/academicdishonestypolicy/>

TITLE IX AT UTHSCSA

Title IX Defined:

Title of the Education Amendments of 1972 is a federal law that prohibits sex discrimination in education. It reads “no person in the United States shall, on the basis of sex, be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any education program or activity receiving Federal financial assistance.”

University of Texas Health Science Center San Antonio’s Commitment:

University of Texas Health Science Center San Antonio (UTHSCSA) is committed to maintaining a learning environment that is free from discriminatory conduct based on gender. As required by Title IX, UTHSCSA does not discriminate on the basis of sex in its education programs and activities, and it encourages any student, faculty, or

staff member who thinks that he or she has been subjected to sex discrimination, sexual harassment (including sexual violence) or sexual misconduct to immediately report the incident to the Title IX Director.

In an emergency, victims of sexual abuse should call 911. For non-emergencies, they may contact UPD at 210-567-2800. Additional information may be obtained at <http://students.uthscsa.edu/titleix/>

EMAIL POLICY

Emails will be the main communication venue between instructors/course director and students.

USE OF RECORDING DEVICES

Use of audio recording devices is permitted during didactic lectures.

ELECTRONIC DEVICES

Laptop computers and tablets are permitted in the class.

Course schedule

Week	Day	Date	Location	Topic	Instructors
9	Thur	3/09/17	MED 2.212C	Protein processing, trafficking & degradation	Hai Rao
10	Tues	3/14/17		Spring Break	
	Thur	3/16/17			
11	Tues	3/21/17	MED 2.212C	Protein processing, trafficking & degradation	Hai Rao
	Thur	3/23/17	MED 2.212C	Membrane structure, potential, and ion movement	Jim Lechleiter
12	Tues	3/28/17	MED 2.212C		
	Thur	3/30/17	MED 2.212C	Apoptosis, autophagy	Guangming Zhong
13	Tues	4/4/17	MED 2.212C		
	Thur	4/6/17	MED 2.212C	Extracellular matrix/integrin signaling, and cytoskeleton	LuZhe Sun
14	Tues	4/11/17	MED 2.212C		
	Thur	4/13/17	MED 2.212C	G-protein coupled receptors; Nuclear receptors	Bandana Chatterjee
15	Tues	4/18/17	MED 2.212C		
	Thur	4/20/17	MED 2.212C	Cell junctions and gap junctions	Jean Jiang
16	Tues	4/25/17	MED 2.212C		
	Thur	4/27/17	MED 2.212C	Cell cycle, checkpoints, cell senescence	P. Renee Yew
17	Tues	5/2/17	MED 2.212C		
	Thur	5/4/17	MED 2.212C		
18	Tues	5/9/17	MED 2.212C	Growth factor signal transduction	Lily Dong
	Thur	5/11/17	MED 2.212C
